Rotaract Club of Xiamen University Malaysia

Rotary Club of Kuala Lumpur Dynamics

Rotary Club of Tun Razak Exchange

# SDC Hackathon

# Technical Tools Declaration

**Hosted by Xiamen University Malaysia (XMUM) AI Club**
**Submission Deadline: 25 October 2026**

Instructions: Declare every API, cloud service, AI tool, dataset, model, and sponsor resource your team used to build the project. Complete every section; where a category does not apply, tick "No" or write "None" – do not leave it blank. Submit as a single PDF document named "SDC2026_TeamName_TechDeclaration.pdf" together with your project submission. Undeclared third-party resources discovered at judging may affect your score or eligibility.

**SDC HACKATHON 2026**

# Technical & Tools Declaration

Hosted by Xiamen University Malaysia (XMUM) AI Club

Submission Deadline: [Insert date]

Instructions: Declare every API, cloud service, AI tool, dataset, model, and sponsor resource your team used to build the project. Complete every section; where a category does not apply, tick "No" or write "None" – do not leave it blank. Submit as a single PDF document named "SDC2026_TeamName_TechDeclaration.pdf" together with your project submission. Undeclared third-party resources discovered at judging may affect your score or eligibility.

## 1. Team & Project Overview

| | |
|---|---|
| **Team Name** | Byte force |
| **Project / Solution Name** | InboxPilot |
| **Name (Leader)** | Huang Jinyin |
| **Email & Phone (Leader)** | Jinyinhuang18@gmail.com |
| **University Affiliation(s)** | Xiamen University Malaysia |
| **Live Prototype URL** | https://sdchackathonsubssion-f3ojkr2fxgrc96alvkgttr.streamlit.app/ |
| **Code Repository URL (public / access granted to judges)** | https://github.com/duanyingshu610-dev/SDC_Hackathon_Subssion |

# 2. Architecture & Technology Stack

## 2.1 System Architecture Overview

*Describe how the components declared in this document connect end-to-end (e.g., user interface → backend → AI model/API → database → cloud hosting). Attach a system block diagram as an appendix if available.*

***[Maximum 200 words]***

## 2.2 Languages, Frameworks & Libraries

*List the main programming languages, frameworks, and third-party libraries that your team did not create. Open-source use is permitted provided it is declared and properly licensed/attributed.*

| Name & Version | Purpose in Project | License |
|---|---|---|
| Python 3.12 in the Docker image; local launcher supports Python 3.12–3.14. Streamlit Cloud's Python version is not pinned. | Implements the triage backend, Streamlit workbench, and standalone SQLite demo | PSF-2.0 for the Python implementation. |
| HTML5, CSS, JavaScript; no external package or version pinned | Implements the standalone Sample and Empty browser simulations. | No separate license applies to the language standards; the prototype code is team-authored. |
| Streamlit | Provides the interactive Python workbench UI. | Apache-2.0. |

| Name & Version | Purpose in Project | License |
| --- | --- | --- |
| pandas | Displays tabular data and exports the demo audit log as CSV. | BSD-3-Claus |
| Python standard library: sqlite3, datetime, json, hashlib, uuid, pathlib, sys; version bundled with Python | Supports the local SQLite demo and utility functions. | and utility functions.PSF-2.0 for Python’s standard library; SQLite itself is public domain. |
| | | |

## 3. APIs & Cloud Services

### 3.1 External APIs

*List every external API your solution calls (GenAI, maps, payments, messaging, data feeds, etc.). Do not include API keys or secrets in this document.*

| API & Provider | Purpose in Project | Access Tier (free / paid / sponsor-provided) |
|---|---|---|
| | | |
| | | |
| | | |
| | | |
| | | |

### 3.2 Cloud Platforms & Deployment

*List every cloud service used for hosting, storage, databases, authentication, or compute, and indicate how the prototype is deployed.*

| Service & Provider | Purpose in Project | Plan / Region |
|---|---|---|
| GitHub | Stores the public source code repository and provides the source for the Streamlit deployment. The app itself has no user login system. | Public repository; GitHub account plan not verified; hosting region is managed by GitHub. |
| Streamlit Community Cloud | Intended hosting and compute for the Streamlit workbench, deployed from the GitHub repository. Public availability is currently unverified. | Community Cloud free plan; United States, provider-managed region. |
| Replit | Imported the GitHub repository and ran the Streamlit workbench via Run workflow. Preview returned HTTP 200; not published. | Free workspace; no AI credits used. Temporary Preview only; no published deployment. Region not shown. |

| Service & Provider | Purpose in Project | Plan / Region |
| --- | --- | --- |
| | | |
| | | |

# 4. AI Tools, Models & Datasets

## 4.1 AI Models Used in the Solution

*List every AI model embedded in or called by your application, including pre-trained, fine-tuned, and self-trained models.*

| Model & Version | Source / Provider | Usage (pre-trained / fine-tuned / self-trained) | License / Terms |
|---|---|---|---|
| No AI model integrated (Prototype v1.4) | None — locally executed Python application | No pre-trained, fine-tuned, or self-trained AI model is currently embedded or called by the application. | Not applicable |
| Rule-based message prioritization | Custom Python logic | Rule-based message classification and priority assessment; not an AI model. | Original project code; subject to project terms |
| Template-based reply generation | Custom Python logic | Generates demonstration replies from predefined templates; not an LLM. | Original project code; subject to project terms |
| Pandas (version specified in project dependencies) | pandas development team | Data loading and tabular data processing; not an AI model. | BSD 3-Clause License |
| Streamlit (version specified in project dependencies) | Streamlit, Inc. | Web interface and interactive application framework; not an AI model. | Apache License 2.0 |

## 4.2 Datasets

*List all datasets used for training, fine-tuning, evaluation, or in the running application. State clearly if a dataset contains personal or sensitive data.*

| Dataset Name | Source / URL | Type (public / private / self-collected / synthetic) | License | Personal Data? (Y/N) |
|---|---|---|---|---|
| MessagePilot In-App Demo Examples | eam-generated examples embedded in src/web/Workbench/app.py, src/web/Sample/index.html, src/web/Empty/index.html, and src/run_demo.py | Synthetic | Team-generated; no external dataset license. No separate dataset license declared. | N |
| SDC Domain 2 Synthetic Message Handoff Dataset v2 | Included in the repository under src/data_handoff/; contains synthetic messages, contacts, projects, and reference labels | Synthetic | Team-generated; no external dataset license. No separate dataset license declared. | N |
| | | | | |
| | | | | |
| | | | | |

### 4.3 AI-Assisted Development Tools

*Tools used to help write code, design, content, or documentation (e.g., chat assistants, code completion tools, image generators). Declaring these tools does not reduce your score; undeclared use may.*

Did your team use any generative-AI tool to help create code, design, text, or other project material?

√ Yes ☐ No

If yes, list them below:

| **Tool & Version** | **Used For** | **Extent of Use (minor / moderate / major)** |
|---|---|---|
| chatGPT | Generate synthetic data. | |
| Codex | Write code. | |
| doubao | Write code | |
| codex | Generate an AI large language model. | |
| Replit Agent (version not listed) | Configured Run workflow and checked app Preview. | Minor |

Briefly describe how your team reviewed, tested, and took responsibility for AI-generated output:

***[Maximum 100 words]***

| |
|---|
| AI-assisted code and text were treated as drafts and reviewed by the team for correctness, safety, and consistency with the project requirements. We manually checked the prototype using synthetic scenarios and exercised its simulated workflows; the automated test suite has not yet been run. The application does not call an AI model at runtime—message scoring uses hand-written rules. The team takes responsibility for the submitted code, data, claims, and any corrections required. |

## 5. Sponsor-Provided Resources

*Declare any official SDC sponsor-provided GenAI API, cloud credits, tools, mentoring, or data that your team used.*

Did your project use any official SDC sponsor-provided resource?

☐ Yes ☑ No

If yes, list them below:

| **Sponsor** | **Resource (API / credits / platform / data)** | **How It Was Used in the Project** |
|---|---|---|
| | | |
| | | |
| | | |
| | | |

Was the sponsor resource essential to the core functionality of the prototype, or could it be replaced? Explain briefly:

***[Maximum 100 words]***

| |
|---|
| |

## 6. Security, Privacy & Responsible Use

### 6.1 Data Handling & Privacy

*What user or personal data does your application collect, store, or send to third-party services (including AI APIs)? How is it protected, and how long is it kept? State "No user data is collected" if applicable.*

***[Maximum 150 words]***

*No user data is collected*

### 6.2 Known Limitations & Risks

*Identify the main technical limitations of your AI components (e.g., hallucination, bias, rate limits, dependency on a single provider) and any mitigation you have implemented.*

***[Maximum 150 words]***

The prototype does not use a trained AI model or call an external AI API. Its message scoring relies on hand-written keyword and sender-role rules, which may miss context, sarcasm, negation, or wording in languages not covered by the rules, and may produce false positives or false negatives. The scores have not been validated on real-world data; all examples are synthetic. As mitigations, the system flags results for human review and disables message sending. It has no AI-provider rate limits or model-provider dependency. The RunPod adapter is not deployed, and the prototype is not connected to live messaging channels or a production database.

## 7. Compliance & Readiness Checklist

*Tick all boxes that apply before submitting.*

- ∨ All APIs, cloud services, AI tools, models, and datasets used in the project are declared in this document.
- ∨ All third-party code, datasets, and models are used in accordance with their licenses, and attribution is provided where required.
- ∨ No API keys, passwords, or other credentials are exposed in the code repository, prototype, or this document.
- ∨ Any use of generative-AI tools for development has been disclosed and reviewed by the team.
- ∨ Any use of official SDC sponsor resources has been declared in Section 5.
- ∨ The prototype described here is accessible to judges through the links provided in Section 1.
- ∨ All fields in this template have been completed within the word limits stated.

## 8. Declaration

By submitting this document, the team leader confirms that the information provided is complete and accurate to the best of the team's knowledge, and that every API, cloud service, AI tool, dataset, model, and sponsor resource used in the project has been declared.
